Thanks for the heads up, Miranda. I will keep an eye out for a planner, etc. so we can start diving into it and getting traction.

Subject: Logistics Order Routing Project

Hi Katrina,

I think Ramona Sullins will be reaching out to you in the near future to discuss rollout of a project that will route orders directly to McKesson when the DC is out of product. This is a really important project for our suspicious order monitoring program because it will reduce the number of orders going directly to McKesson from the pharmacy. Those direct to McKesson orders limit our ability to get full visibility to what pharmacies order and this project will be very helpful to us.

Anything you can do to help move the rollout of this project forward would be greatly appreciated!

Thanks,
Miranda Johnson, JD
